Dear Damien

On behalf of everyone involved in Foundation Diane and the Institute for Magnetic Resonance Research (IMRR) we thank you and all at Blue Pie for your support and creativity in the launch of Foundation Diane.

The inaugural Gala and auction could not have happened without the support received from a wide range of professionals such as the team at Blue Pie.

Your willingness and ability to secure the performers for the evening of the calibre of Barry Crocker, Rodney Marks, Dino Jag and Tommee made it an event to be remembered. Your Hollywood memorabilia added a unique touch to the auction items. It was very exciting for many of us to even have the opportunity to see Elvis Presley and John Lennon memorabilia.

Indeed, the Gala has received accolades from health care professionals to commercial entities, including people who attend such events on a regular basis. They are all of the opinion that this was one of, if not the best event of its kind on record.

As IMRR approaches its 11th year we believe we are very well placed to reach our goal of offering hope by providing early detection of cancer and the diagnosis of other diseases by ensuring magnetic resonance techniques are available in hospitals and clinics in Australia and worldwide.

Damien, your enthusiasm for the Foundation Diane project, supported by your business acumen and knowledge of the entertainment world was an enormous asset to Foundation Diane. Our sincere thanks for your contributions.

With kind regards

Professor Carolyn Mountford
